PLEASE PRINT THIS PAGE AND BRING IT TO YOUR PRECONSTUCTION MEETING

#1- Roof metal color-_____

*Which also wraps around the side of the dock on the upper, outside trim. See above picture.

*We do not recommend white for this option, as the roof can look stained when leaves/debris sit on top.

#2- Side metal color-_____

*Typically contrasting to #1 Roof Metal Color

#3- Underside metal color-_____

#4- Steel frame color -_____

*We can paint the steel frame any color that you'd like, but personally, we feel the darker colors hide more of the bugs/grime. By far our most popular steel frame colors are black, dark gray and dark brown.

OPTIONAL #5 Composite Decking Choices (if applicable for your project)-_____

*Azek/TimberTech- The Harvest Collection (Slate Gray, Brownstone, Kona) is included in our pricing, but specialty colors can be up-charged.

Composite Decking Choices (if applicable for your project)-

*Azek/TimberTech- The Harvest Collection (Slate Gray, Brownstone, Kona) is included in our pricing, but specialty colors can be up-charged.
